of BUENA PARK

PATIENT: Brian Tran
REFERRED BY: Caleb Kil PA-C
PATIENT NO: UM4665227

DATE OF EXAM: 02/14/2025
DOB: 10/07/2011
SEND TO: (714) 527-8990

SCOLIOSIS SURVEY - ONE VIEW

Millennium Plus

INDICATION: scoliosis

COMPARISON: None

FINDINGS:

There are no segmentation anomalies. There is 61° right convex curvature of the thoracic spine measured from superior endplate of T6 vertebral body and inferior endplate of L1 vertebral body. There is 36° left convex curvature of the lumbar spine measured from superior endplate of L1 vertebral body and inferior endplate of L4 vertebral body.

Remainder of the visualized soft tissue and osseous structures are unremarkable.

The visualized cardiopulmonary structures are unremarkable.

There is a nonobstructive bowel gas pattern.

IMPRESSION:

61° right convex curvature of the thoracic spine measured from superior endplate of T6 vertebral body and inferior endplate of L1 vertebral body.

36° left convex curvature of the lumbar spine measured from superior endplate of L1 vertebral body and inferior endplate of L4 vertebral body.
